RESORT MANAGEMENT SYSTEM

Hocus Focus

Abstract for the project

The Resort Management System is a software application developed to automate and simplify the daily operations of a resort. It enables efficient management of room bookings, guest check-in/check-out, customer records and billing through a centralized platform. The system reduces manual work, improves data accuracy, and saves time by streamlining administrative tasks. It also provides secure data management and generates reports to help monitor occupancy, revenue, and overall performance. By enhancing operational efficiency and customer service, the Resort Management System offers a reliable, user-friendly, and effective solution for modern resort management.

we present you the,

Methods used

Room booking

✓

Availability check

the proposed Resort Management System automates room booking, guest management, and billing. It reduces manual work and improves accuracy. The system stores data securely using file handling in C. It saves time and makes resort operations more efficient. Overall, it provides a simple and reliable management solution.

Project

Limitation of existing system

Cons of this system

- Time-consuming processes
- Increased paperwork
- Higher risk of errors
- Poor data security
- Difficult to maintain customer records
- Lack of automated reports
- Inefficient resource management

Hocus Focus

Advantage of proposed system

pros of this system

- Faster and more efficient operations
- Accurate record management
- Reduced paperwork
- Improved data security
- Easy search and retrieval of information
- Better customer experience
- Time and cost savings
- Reliable report generation

Requirements for this system

Software Requirements

- Operating System: Windows 10/11
- Programming Language: C Programming
- Database: File Management
- IDE: VS Code

Web Browser: Google Chrome

Hardware Requirements

- Processor: Intel Core i3 or above
- RAM: 4 GB minimum (8 GB recommended)
- Storage: 500 GB HDD or 256 GB SSD
- Monitor: 1366 × 768 resolution or higher
- Keyboard & Mouse

Internet Connection: Required for online access

System details

Output of the System

```
PS C:\monica\Nms> .\Hms.exe
